REQUEST FOR PROPOSAL PS- #1110 ENVIRONMENTAL MONITORING SERVICES FOR THE FERRASCI BRIDGE REPLACEMENT PROJECT

QUESTIONS AND ANSWERS

January 11, 2011

-
- 1. In the RFP, the following appears on page 5: "Propose total fixed fees to complete project as described under Project Scope." Does this mean a single fixed price for the work, or the more conventional "time-and-materials, not to exceed" type of cost proposal?*

Proposals should provide a "time and materials, not to exceed" fee to complete project as described under Project Scope.

-
- 2. Could you clarify if the fisheries biologist with approval to handle/relocate steelhead is required to be the onsite monitor for the whole duration of the project, or just during initial survey, dewatering and clearance/relocation activities. If just during initial work, would the monitor only need to be CRLF approved for the duration of the work with fisheries specialist available as on-call?*

The fisheries biologist must continuously monitor installation and removal of the diversion, the workspace, and construction activities until the completion of construction. *For additional details, please refer to NOAA Fisheries' biological opinion.*
